Profile Summary

Software Engineer with 1.9 years of experience in developing scalable enterprise web applications using Angular, TypeScript, JavaScript, HTML5, and CSS3. Experienced in building reusable UI components, integrating RESTful APIs, optimizing application performance application and collaborating in Agile development environments.

Strong understanding of component-based architecture, SDLC. Passionate about delivering clean, maintainable and customer-focused software solutions.

Technical Skills

- **Frontend:** Angular (v12, v16), JavaScript (ES6+), TypeScript, RxJS, HTML5, CSS3, Bootstrap
- **Architecture:** Component based Architecture, MVC
- **Performance:** Optimization, Lazy Loading, API Handling
- **Backend:** PHP, Laravel, RESTful APIs
- **Database:** MySQL
- **Tools:** Git, GitHub, Postman, Jira, Chrome DevTools, Jasmine (basic), Karma (basic)
- **Concepts:** SDLC, Code Quality, Debugging, Problem Solving

Education

Bachelor of Engineering (EEE) – 2020
Francis Xavier Engineering College, Tirunelveli
CGPA: 7.25 / 10

Work Experience

Software Engineer, Novac Technology Solutions | July 2023 – April 2025

Project 1 - ShriramFinance.in – Web Application

Tech Stack: Angular, TypeScript, RxJS, Laravel, REST APIs, MySQL, Drupal

- Developed and maintained scalable production grade Angular modules and reusable UI components for enterprise web applications.
- Translated UI/UX design requirements into responsive, reusable and high performance UI components using HTML, CSS and Bootstrap.
- Integrated RESTful API using Angular HTTP Client and RxJS for reactive programming, observables and efficient asynchronous data handling.
- Developed user facing web applications with a focus on performance, usability, and cross browser compatibility.

- Analyzed business requirements and translated them into scalable technical solutions. Built Clean, maintainable and reusable code following best practices and coding standards.
- Participated in debugging, troubleshooting and optimizing application performance to enhance user experience. Collaborated within Agile development teams across requirement analysis, development, testing and deployment phases.
- Implemented client side validation to ensure data integrity before submission. Optimized frontend performance by reducing unnecessary API calls and improving rendering efficiency.
- Collaborated with cross functional teams to deliver high quality features within timeline
- Contributed to backend development using Laravel, MySQL including API development and secure authentication mechanisms.

Project 2 - Resource Management System

Tech Stack: Laravel, PHP, MySQL, Bootstrap, HTML, CSS

- Developed a role based Management System using Laravel, MySQL, and Bootstrap to efficiently manage and track organizational resources.
- Designed and implemented responsive user interfaces with HTML, CSS and Bootstrap, Designed database schema using laravel migrations and managed relationships using Eloquent ORM.
- Implemented RESTful APIs for resource allocation and tracking workflows. Applied token-based authentication and authorization for secure access control.
- Implemented CSRF protection, input validation, and secure backend logic to prevent SQL injection and XSS attacks.
- Optimized MySQL queries, improving application response time, and overall performance.

Soft Skills

- | | |
|----------------------------------|-------------------|
| • Cross-Functional Collaboration | • Adaptability |
| • Continuous Learning | • Time Management |

Achievements

- Successfully delivered production web pages using Angular, Drupal, and Laravel within defined timelines by collaborating effectively with cross-functional teams and managing priorities efficiently.
- Applied SEO best practice and quickly adapted to new tools and project requirements, contributing to scalable, maintainable, and high quality production web applications.
