

PREETHI

Software Engineer

mail: cvpreethichellappa@gmail.com — Mobile: (+91) 8610160137.

Portfolio: <https://preethi-portfolio-six.vercel.app>

Profile Summary

I am a Software Engineer with 1.9 years of professional experience in developing scalable web applications using Angular, TypeScript, JavaScript, Laravel, REST APIs, and MySQL

I have recently completed training in Java and Java frameworks and gained hands on experience with Java, Spring Boot, Spring Core, Hibernate, Spring JDBC, Springs MVC, REST APIs through practical projects.

With a strong foundation in frontend and web application development, I am now transitioning into Java Backend / Java Full Stack development, focusing on building clean, scalable, and maintainable enterprise applications.

Technical Skills

- **Programming Language:** Java, JavaScript (ES6+), TypeScript, PHP
- **Backend & Frameworks:** Spring Boot, Spring Core, Spring MVC, Spring JDBC, Spring Data JPA, Hibernate, RESTful APIs, Laravel
- **Database:** MySQL
- **Frontend:** Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, RxJS
- **Tools:** Git, GitHub, Postman, Jira, Chrome DevTools, NPM, Maven
- **Concepts:** SDLC, Code Quality, Debugging, Problem Solving, Application Security

Education

Bachelor of Engineering (EEE) – 2020

Francis Xavier Engineering College, Tirunelveli

CGPA: 7.25 / 10

Professional Experience

Software Engineer, Novac Technology Solutions | July 2023 – April 2025

Project 1 - ShriramFinance.in – Web Application

Tech Stack: Angular, TypeScript, RxJS, Laravel, REST APIs, MySQL, Drupal

- Developed and maintained 20+ production grade web pages using Angular, scalable and component based architecture.
- Integrated RESTful API using Angular HTTP Client and RxJS for reactive programming, observables and efficient asynchronous data handling.
- Optimized frontend performance by reducing unnecessary API call and improving rendering efficiency; implemented client side validation and participated in debugging, testing, troubleshooting and optimizing application performance.
- Worked across SDLC phases including development, testing and deployment support.
- Collaborated with cross functional teams to deliver high quality features within timeline and Contributed to backend development using Laravel, MySQL

Project 2 - Resource Management System

Tech Stack: Laravel, PHP, MySQL, Bootstrap, HTML, CSS

- Developed a role based Management System using Laravel, MySQL, and Bootstrap to efficiently manage and track organizational resources.
- Designed and implemented responsive user interfaces with HTML, CSS and Bootstrap, Designed database schema using laravel migrations and managed relationships using Eloquent ORM.
- Implemented RESTful APIs for resource allocation and tracking workflows. Applied token-based authentication and authorization for secure access control.
- Implemented CSRF protection, input validation, and secure backend logic to prevent SQL injection and XSS attacks. Optimized MySQL queries, improving application response time, and overall performance.

Personal Project

Online Food Ordering System

Tech Stack: Java, Spring Boot, Spring Data JPA, Hibernate, REST APIs, Bootstrap, MySQL

- Developed a role based Online Food Ordering application using Java, Spring Boot, Spring Data JPA, Hibernate and MySQL.
- Implemented separate Admin, Restaurant and User modules with role based authentication and authorization.
- Developed Admin dashboard functionality for managing food items, restaurants, registered users and customer purchase history.
- Implemented restaurant approval and status management allowing administrator to activate and deactivate restaurants and notify restaurant owners through email.
- Developed restaurant side functionality for food item CRUD operations and order management.
- Implemented an order lifecycle workflow with statuses including Ordered, Preparing, Out for Delivery and Cancelled.
- Developed user side features food browsing, cart management, order placement, and tracking.
- Implemented database operations using Spring Data JPA, Hibernate and MySQL for managing users, restaurants, food items, carts, and orders.
- Applied MVC architecture, repository based data access, entity relationships, and validation to build maintainable and scalable application functionality.

Soft Skills

- Cross Functional Collaboration
- Continuous Learning
- Adaptability
- Time Management
